PRODUCT SPECIFICATION SHEET

Gold Doré

Au 85%–96% fineness, silver-bearing

Silver-bearing doré bars offered for qualified refinery and precious-metals requirements, subject to source review, assay and transaction approval.

PRODUCT PARAMETERS

- Purity and form: Au 85%–96%, silver-bearing numbered doré bars
- Minimum lot: 5 kg per consignment
- Packaging: tamper-evident sealed transit cases, as agreed

COMMERCIAL BASIS

- EXW secured handover point, or delivery to an agreed refinery
- Valuation against a recognised gold reference and contracted payable-metal formula
- Final settlement subject to contracted assay, refinery outturn and agreed deductions

TRANSACTION CONTROLS

- Supplier, declared origin and legal right to sell reviewed before allocation
- Bar list, weights, seals and assay records confirmed for the approved lot
- Applicable export, customs, secure-carriage and insurance records where contracted

RFQ INFORMATION

- Product form, provisional Au/Ag assay, gross and fine weight, and bar count
- Declared origin and available source documentation
- Destination refinery or delivery point, preferred Incoterm and required schedule

Indicative specification only. Availability, assay, settlement, custody and delivery terms are confirmed in the executed sale and purchase agreement. Mercury screens counterparties against applicable sanctions regimes and does not trade material of unverified origin.
